

SHUBHAM PATEL

Frontend Developer | UI/UX Focused

Noida, U.P., India | jshubh200313@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Final-year B.Tech(Information Technology) student and frontend developer with a strong eye for UI/UX design. Skilled at translating wireframes and prototypes (Figma, Adobe XD, Sketch) into pixel-perfect, responsive, and accessible interfaces using React, Next.js, and SwiftUI. Experienced across the full product-design-to-code loop — from interactive prototypes to production-grade, animated, and accessible front-end applications. Seeking an Entry-Level Frontend Developer / UI-UX Developer role.

TECHNICAL SKILLS

Design & Prototyping: Figma, Adobe XD, Sketch, Wireframing, Prototyping, Design Systems, Responsive Design, Accessibility (WCAG basics)

Frontend Development: React.js, Next.js, TypeScript, JavaScript, SwiftUI, Tailwind CSS, HTML5, CSS3, Recoil, Zustand

Backend & APIs (Supporting): Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Databases & Tools: MongoDB, PostgreSQL, Supabase, MySQL, Git, GitHub, Postman, Vercel

Core CS Concepts: Data Structures & Algorithms (DSA), OOP, Operating Systems, DBMS, Computer Networks

PROJECTS

macOS-Inspired Developer Portfolio — Interactive OS-Themed UI/UX Case Study [Live Demo](#)

Tech Stack: React.js, Vite, Tailwind CSS, Zustand, Figma

- Designed and built an interactive macOS-themed interface with draggable windows, dock navigation, and a Finder-style project explorer, focused on intuitive, real-world interaction patterns.
- Crafted a dynamic Photos gallery experience with infinite scroll, location-based folders, and automated slideshow transitions, closely replicating native macOS UX.
- Iterated on layout, spacing, and micro-interactions to deliver a polished, cohesive user experience across screen sizes.

AI Voice Recruiter — AI-Powered Recruitment & Interview Platform [GitHub](#)

Tech Stack: Next.js, React.js, Figma, Tailwind CSS, Supabase, LLM/NLP APIs

- Designed and implemented a fully responsive, accessible interface for an AI recruitment platform, prioritizing clarity and ease of use for both candidates and recruiters.
- Translated user flows into clean, role-based UI screens with secure authentication and streamlined navigation.
- Improved usability of real-time, AI-generated interview content through thoughtful layout and information hierarchy.

CryptoAPP — Native iOS Application UI (SwiftUI) [GitHub](#)

Tech Stack: Swift, SwiftUI, MVVM Architecture, Combine, CoreData

- Designed and developed a multi-view iOS interface for real-time cryptocurrency tracking, optimized for quick scanning of live data. Built smooth, responsive UI components in SwiftUI, including considered loading and offline states backed by CoreData.
- Structured the UI with MVVM architecture to keep design and logic cleanly separated for long-term maintainability.

PDF to MCQ Generator — AI-Based Quiz Generation System [GitHub](#)

Tech Stack: Python, Streamlit, PyMuPDF, SpaCy, NLP, ReportLab

- Designed an interactive quiz-taking interface with real-time scoring and instant visual feedback for users. Built a simple, low-friction upload-to-quiz flow to guide users from raw documents to a usable quiz. Implemented a clean, exportable results layout in PDF format for offline use and accessibility.

OPEN-SOURCE CONTRIBUTIONS

markdown-reader: Fixed frontend layout and responsiveness issues — hero section spacing, dynamic button positioning, and grid adaptation across viewport sizes — improving overall visual consistency.

preCICE (Engineering Simulation Ecosystem): Contributed via the upstream GitHub pull-request workflow, collaborating with an international developer community on code and interface review.

EDUCATION

G. L. Bajaj Institute of Technology and Management

Bachelor of Technology in Information Technology

Greater Noida, U.P. | 2022 – 2026

S R H R Sr. Sec. School

Intermediate / Class XII

Bilaspur, G.B. Nagar | 2019 – 2020

ACHIEVEMENTS

FinxThon'24 Hackathon: Secured 6th place overall competing against 200+ developer teams, building an innovative tech solution under strict timeline constraints.
